

QUALITY POLICY

Quality is a top priority for all of us in ATR.

This policy guides all our actions: sales, production, support... Quality is essential to achieve our ambition of being the undisputed leader on the regional turboprop market worldwide. More than a priority, it is inherent in everything we do and it starts with the way we act, behave, respond to each other!

Our Business Management System Policy summarizes the key elements of our commitments to excellence and includes:

- building a mutually profitable relationship with our customers, ensuring their long-term success thanks to **safe operations and reliable products**
- fostering a **culture of quality** with the objective of developing, manufacturing and providing products, services and attitudes that are trusted and preferred by our customers
- being proactive with regards to inherent **risks** to our activities and identifying **opportunities** to exceed our objectives and make progress
- **complying with relevant laws and regulations** as well as internal requirements
- encouraging the **integrity** of what we deliver to our customers internally and externally
- **promote quality** amongst employees and stakeholders through effective communication

Quality generates trust. Trust generates efficiency. You can rely on my engagement to support and promote the highest standards of quality for our customers. Only our daily acts will bring us to excellence. I ask that each of us challenges himself or herself everyday to make a contribution towards quality – big or small – on the job or in the corridor – with an internal or an external customer.

ATR also leads in quality – in everything we do!

Christian SCHERER
Chief Executive Officer
