

PRESS RELEASE

Skyways Technics becomes new member of the ATR MRO Network

Toulouse, November 30, 2016 – ATR is pleased to announce that Skyways Technics, based in Sonderborg, Denmark and specializing in aircraft maintenance, repair and overhaul (MRO), has joined its network of recommended aircraft maintenance centers. In an agreement signed today between ATR and Skyways Technics, the firm commits to offer maintenance solutions in full compliance with the fundamental and comprehensive customer service rules defined by ATR.

Launched in 2012, this MRO network already includes maintenance and service providers based in Asia, Latin America and Europe. The MRO network is an essential part of the regional policy deployed by ATR, which aims to offer high quality, local solutions to its operators for maintenance, logistics and training.

Founded on the basis of Cimber Air Maintenance Center A/S, MRO of one of the first ATR operators in Europe, Skyways Technics has over 30 years of maintenance experience on ATR aircraft. Its offer features a wide range of aircraft maintenance services, from line to base maintenance and on-site support.

Commenting on this new agreement, Benjamin Nielsen, Chief Executive Officer of Skyways Technics, declared: “We are proud of the expertise we have developed on ATR aircraft for three decades. Today, integrating its network is a real sign of recognition for us. Our geographic situation in the Southern part of Denmark makes it easy and fast to access from anywhere in northern Europe and Scandinavia, a region with a significant number of ATRs in operation.”

Tom Anderson, Senior Vice President Commercial and Customer Support of ATR, declared: “Skyways Technics has been providing highly-qualified and reliable maintenance solutions to ATR aircraft for years, thus becoming a natural choice when expanding our offer of services in northern Europe. We are pleased to partner with such a recognized service provider when it comes to supporting our increasing fleet in this region.”

About Skyways Technics:

Danish MRO provider Skyways Technics is one of the most long-standing ATR maintenance organizations in Europe, with over 30 years of experience. The firm specializes in regional aircraft maintenance and is constantly focusing on customer needs. Skyways Technics is proud to provide operators with the high level of service they deserve.

About ATR:

Founded in 1981, ATR is the world leader on the market for below-90-seat regional aircraft. Since its creation, ATR has sold over 1,500 aircraft. ATR aircraft equip the fleets of some 200 airlines in nearly 100 countries. ATR is an equal partnership between two major European aeronautics players, the Airbus Group and Leonardo. Based in Toulouse, France, ATR is well established worldwide with a large customer support and sales network, including Customer Service Centers, training centers and warehouses.
