

PRESS RELEASE

ATR announces 75 new orders at International Paris Air Show worth US\$ 1.7 billion

Further proof of the enduring appeal of turboprop technology and ATRs, the most efficient regional aircraft with the best environmental credentials

Paris-Le Bourget, 19 June 2019 – The world number one regional aircraft manufacturer ATR announces a total of 75 order commitments, including 35 firm orders from NAC disclosed on June 18, on the occasion of the 53rd International Paris Air Show. The total value of the deals reaches US\$ 1.7 billion. This shows ATR is well on track to achieve its order targets for 2019.

These commitments include 17 orders for the new ATR 42-600S – the Short Take Off and Landing (STOL) variant of the ATR 42, offering optimised capabilities to take-off from and land on runways as short as 800 meters. ATR has announced three launch customers for this new version, including Air Tahiti, Elix Aviation and one undisclosed customer. ATR is currently finalising the process for the official launch of this new 42-600 variant and received authorisation to take in orders for the aircraft, subject to the final confirmation for launch from the company's Board of Directors, expected before year end.

Stefano Bortoli, Chief Executive Officer of ATR commented: "This is a remarkable proof of confidence for ATR, and excellent news for the communities who will benefit from improved connectivity. It shows how the purpose of ATR to connect communities in a sustainable manner is delivering value to our customers. No matter the profile or operating environment of our customers, our aircraft prove their superiority for regional operations, thanks to unbeatable economics, environmental performance and versatility. With continuous product improvement such as our freighter 72-600F and the new 42-600 STOL version, we aim to keep ATR at the forefront of regional aviation."

These commercial results are also further proof of the efficiency of the turboprop technology, which ensures the enduring appeal of the ATR aircraft, which have the best environmental credentials on the regional market. The ATR 72-600 has a strong environmental advantage compared with regional jets, in that it emits 40% less CO₂, enabling savings of 4,000 tonnes of CO₂ per aircraft per year.

About ATR:

ATR is the world number one regional aircraft manufacturer with its ATR 42 and 72 aircraft the best-selling aircraft in the less than 90-seat market segment. In 2018 the company had a turnover of US\$1.8 billion. The unifying vision of the company's 1,400 employees is to help everyone, no matter where they are in the world, to connect and develop in a responsible manner. Thanks to the efficiency of turboprop technology and the benefits of the company's focus on continuous innovation, ATRs open more than 100 new routes every year, burn 40% less fuel and emit 40% less CO₂ than regional jets. For all of these reasons, ATRs have been chosen by some 200 companies in 100 countries around the world.

ATR is a joint-venture between Airbus and Leonardo. For more information, please visit <http://www.atr-aircraft.com> and www.atr-intolife.com.
