

2021 ENVIRONMENTAL VISION

Make our ISO 14001 Environmental Management System a reference ...

- Continuously improve the Environmental Management System applicable to ATR aircraft and sites
- Maintain regulatory conformity to the requirements applicable to aircraft and sites
- Make the environment a company culture:
 - ❖ supported by improvement proposals from our employees and partners
 - ❖ to serve airlines

...For eco-design ...

- Reduce the environmental footprint of our aircraft: An even “greener” life cycle throughout the aircraft life cycle: design, transport, manufacture, operations, end of life...
 - ❖ From design, control and/or reduce the use of hazardous substances, the consumption of natural resources and generated waste
 - ❖ Communicate good environmental practices to our suppliers and partners by:
 - integrating our environmental requirements from design ...
 - taking the environment into account in choice criteria
 - ❖ Communicate good operational, maintenance and recycling practices for aircraft to our customers

...Eco-efficiently ...

- Make eco-efficiency our objective for the eco-design of our even more competitive aircraft, on sites respecting the environment, with a controlled and/or reduced environmental footprint.

...Improve our environmental performance...

- Within the framework of risk management and the eco-design of tomorrows' "green" aircraft:
 - ❖ To take current and future environmental challenges into account
 - ❖ Prevent all forms of pollution

1/ Eco-design an aircraft:

- Innovate to reach gas emission objectives
 - ❖ Reduce NOx emissions by 60%
 - ❖ Reduce CO2 emissions by 20%
- ATR promises its partners and suppliers to:
 - ❖ Ensure 100% regulatory conformity
 - ❖ Circulate its requirements and good environmental practices
 - ❖ Share its strategic "green" aircraft vision

2/ Production on sites respecting the environment:

- By continuous improvement of the following environmental performance:
 - ❖ Management control and sorting of waste on our sites
 - ❖ Reduction of the consumption of natural resources
 - ❖ Control of fossil fuel consumption
 - ❖ Management of chemical products in compliance with regulations
 - ❖ Implementation of an action plan to reduce greenhouse gas emissions
 - ❖ Prevention of all ground, air and water pollution

3/ Respond to the environmental challenges of our customers:

- Make customer airlines aware and support them in good operational, maintenance and recycling practices for aircraft

...Encourage social responsibility at ATR.

- To develop a Sustainable Development approach based on social, environmental and economic concerns.

Date: 03.17.11
