

ATR environmental targets and objectives 2008 – 2011

Filippo Bagnato engages ATR in:

- ✓ Its environmental commitment
- ✓ The continuous improvement of its Environmental Management System to control and to reduce environmental impacts resulting from our activities

ATR's activities affecting the environment are those pertaining to the following categories:

- ✓ Tertiary sector
- ✓ Services to personnel and sites
- ✓ Aircraft product life cycle
- ✓ Customer training.

Thanks to our environmental program encouraged by our senior management and supported by two organizations (Environment and Reach), our Blagnac and St Martin sites are committed to achieving the following targets by 2011:

1 –Waste sorting and waste management:

- 1-A. 80% of non-dangerous waste sorted
- 1-B. 70% of non-dangerous waste recovered for raw materials or energy
- 1-C. 100% of dangerous waste processed by approved organizations

2 –Consumption of raw materials:

- 2-A. 5% reduction in paper consumption on identical levels of production and staff.
- 2-B. 5% reduction on electricity consumption of the Blagnac site
- 2-C. 100% in house-management of all chemical products, in compliance with regulations (Management of stock and consumption, labeling of containers, Safety data sheets...)

3 –Pollution Control:

- 3-A. Implementation of a Company Transport Program
- 3-B. Prevention of ground and water pollution
- 3-C. Prevention of Air pollution

4 –Regulatory compliance for both our Blagnac and St Martin sites

Our commitment, including ATR, sub-contractors and partners, is necessary.

01.10.10

Filippo Bagnato
Chief Executive Officer
